Welcome to The Magic Transfer Company

World leaders in image transfer solutions.

Since 1992, trading as TheMagicTouch in the UK the company pioneered and marketed a proven range of image transfer products and applications.

Today the company operates as an employee owned trust (EOT) offering four different technology options all designed and tailored to enable users to print and personalise almost any garment, textile or hard surface product.

The company supply and support the latest in digital printers, heat presses and plotters/cutters. All of which are supported with a comprehensive warranty and outstanding technical and sales support.

Image transfer processes offer many advantages over traditional print methods as they remove the need for any traditional artwork, set-up costs or minimum orders thus enabling customers to have what they want, when they want.

Having the ability to produce printed samples for customer pre-evaluation has proved invaluable marketing over the years in assisting to create new business and markets.

All transfer processes are quick, safe, clean and profitable with low entry level cost, low space and low power requirements.

The market for personalisation and garment decoration continues to grow and offers great opportunity to those looking to start a business or those looking to add value to an existing business or organisation.

The Magic Transfer Company continues to develop and bring to market unique product innovations that assist in developing and creating new business opportunities.

U.K Head Office - Dunstable, Bedfordshire

Industry Partners Include

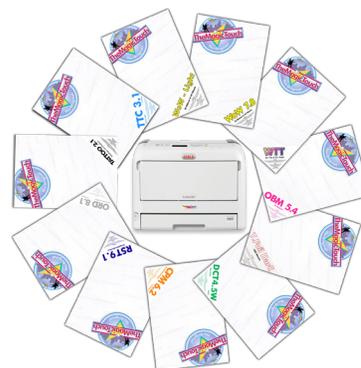

One Company, Four Technologies, Thousands of Opportunities.

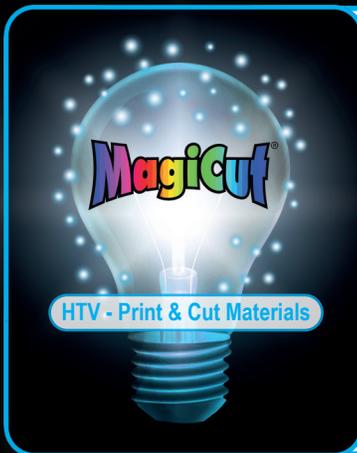

TheMagicTouch® brand, offers 11 different specially coated transfer papers for use in selected toner-based colour printers or copiers.

Each paper has its own specific attributes and offers the ability to print in full colour onto a vast range of products including cotton garments, poly/cotton textiles, ceramics, leather, wood, metal, MDF, glass, PU surfaces, acrylic and even human skin!

Innovations include the introduction of white-toner printers enabling product decoration regardless of surface colour or composition.

Page 4

The MagiCut® brand, consists of over 200 different garment vinyls, flex, flock, glitter and printable materials.

Perfect for single and two colour logos, lettering, numbers and designs to almost every type of workwear, sportswear, leisurewear and promotional accessories.

MagiCut materials are cut using a traditional plotter/cutter and applied using a heat press. The company offer both Roland and Graphtec plotter/cutter options with inclusive design software packages.

Printable PU for print and cut processes available.

Page 10

The DyeSub Magic® brand, offers the full range of Sawgrass sublimation printers, sublimation inks, transfer papers and a host of printable consumables.

Perfect for photographic images onto white mugs, coasters, duraluxe metals, tableware and lots more.

Please note: Sublimation technology requires all items to have a polyester coating or high polyester content.

Entry-level costs for sublimation remain the lowest of all digital transfer technology.

Page 18

DTF Magic® brand, Direct To Film (DTF) digital transfer printing technology.

This new innovation is the process garment decorators have been waiting for. Water-based inks for light and dark garments with no pre-treatment required and suitable for polyester, cotton, sportswear, performance fabrics, pique, canvas, denim, leather and lots more.

The transfer prints have excellent wash durability and stretch properties. Producing the lowest cost per transfer ever.

Page 20

Toner Transfer

TheMagicTouch transfer papers are compatible with selected toner based printers and copiers. All papers are manufactured using the latest technology and highest production standards to ensure consistent results.

Please note that when using toner based transfers the garment or substrate does not require any special pre-treatment, special coating or primer. TheMagicTouch transfer papers are not compatible with any ink-based device.

Toner Based Printers

TheMagicTouch image transfer process works with many current toner based colour Laser/LED printers and copiers. For compatibility of any specific printer make/model contact our technical department direct.

The TMT/OKI printers have proved the best value and most reliable. The option of the white-toner innovation creates a multitude of opportunities.

All printers are installed with the relevant TheMagicTouch software for colour management and correct media settings. All printers come complete with a 3 year manufacturer's warranty and support.

Why Toner Transfer?

Toner-based printers are quicker, offer better colour management and lower cost per copy than the equivalent ink-jet based products.

They can also be used for everyday use on plain paper in addition to the range of CL Media products that feed directly through the printers.

Original OKI Toners Only

TTC 3.1 - White & Light Coloured Fabrics

Full colour transfers to white and pastel colour garments and textiles. Suitable for 100% cotton and polyester fabric based products such as ecobags, mousemats, coolstuff, flip flops, cushions, phone pouches and lots more.

TTC 3.1+ Version - For heavier weave textiles such as pique fabrics, canvas and heavy weight cotton.

Available in A4, A4R, A4XL, A3.
100 sheets per box.

Micro packs of 25 x A4R available.

WoW Light - White & Light Coloured Fabrics

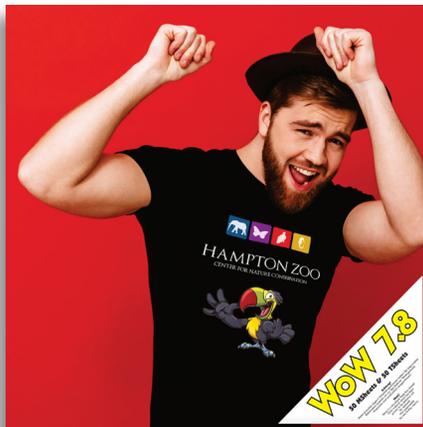

TheMagicTouch WOW – Light is a high-quality transfer paper specifically designed for printing on white and light-colored textiles and fabrics.

It leaves no transfer layers, making it ideal for creating detailed, freestanding designs. This premium two step transfer paper is compatible with all OKI white toner printers.

Available in A4, A3.
50 sheets per box.

Micro packs of 10 x A4 available.

WoW 7.8 - Dark Garments & Fabrics

Award winning two-step process for full colour imaging onto dark garments and fabrics with complex full colour free-form designs. No cutting or weeding required.

Low temperature application to avoid scorching or dye migration.

Suitable for 100% cotton, polyester, leather, PU materials, denim, nylon and performance fabrics.

Available in A4, A4XL, A3.
50 sets per box.

Micro packs of 10 x A4 available.

White Toner Transfer (WTT) – Film & Paper

This White Toner Transfer represents the latest innovation in the transfer paper market. It offers exceptional vibrancy, remarkable durability, and features a transparent film.

Suitable for cotton, polyester, denim, leather, canvas and most textiles and fabrics.

Available in A4 and A3.
Set - 50 sheets film & 50 sheets paper

OBM 5.4 - Dark Garments

Single step opaque coating for full colour transfers to dark garments and fabrics. Shaped detail designs require cutting and weeding.

Suitable for 100% cotton, polyester, leather, PU materials and many other substrates.

Available in A4, A3.
50 sheets per box.

Micro packs of 25 x A4 available.

TATTOO 2.1 - Temporary Tattoo

Two sheet system (paper and adhesive) for skin decoration. Dermatologically safe and certified process. Can also be used to decorate fingernails.

Tattoos will last up to 5-7 days dependant on skin type.

Available in A4.
25 sets per box.

Micro packs of 10 x A4 available.

DCT 4.5 - Waterslide Decal

For full colour decals for the decoration of non compatible and odd shaped products that are susceptible to heat, such as candles, glass, soap and ceramics.

Available in white and clear A4, A3.
50 sheets per box.

Micro packs of 10 (5 white and 5 clear)
x A4 available.

CPM 6.2 - Non-Fabric Items

Decorates a large number of non textile and hard surface products such as cardboard, plastics, magnetic rubber, ceramic, glass, metal, slate, MDF, PU surfaces and lots more.

Please note: Different application pads may be required.

Available in A4, A4R, A4XL, A3.
100 sheets per box.

Micro packs of 25 x A4R available.

T.Foil Dark & T.Foil - Light & Dark Fabrics

Used in conjunction with T.Foil to create stunning metallic effects on any colour fabric or garment.

Apply the T.Foil Dark transfer to the garment, cover with T.Foil and heat press to create stunning metallic effect designs. No cutting or weeding required.

Transfer paper available in A4, A3. 100 sheets per box.
T.Foil Rolls, 300mm x 25m, available in 17 colours.

RST 9.1 - Rough Surface Non-Fabric Items

Transfer paper for non-fabric products and substrates. Especially for rough and soft surfaces like untreated wood and cork, where CPM is not suitable.

Wet release from substrate.

Available in A4, A3. 50 sheets per box.
Micro packs of 25 x A4 available.

ORD 8.1 - Reverse Decoration

The ultimate transfer paper for the full colour decoration of crystal, glass and acrylic.

ORD Flock, black self adhesive velvet effect, applies extra value to the back of awards.

Available in A4, A4R. 50 sheets per box.
The ultimate transfer paper for the full colour decoration of glass and acrylic.

Coverseal - Protective Surface

Transparent film for hard surface applications. Ideal for all types of outdoor products and promotional items.

Provides maximum UV protection and maximum scratch resistance to keep designs looking fresh and vibrant for longer.

Easy to use with a simple one-step application process

Available in A3
50 sheets per box.

CL MEDIA - Self Adhesive Vinyl & Cling

Specialist media for colour laser copiers and printers. Permanent adhesive for indoor and outdoor use.

SPF20 White Gloss, SPF22 White Matt, SPF30 Gold Gloss, SPF40 Silver Gloss
Available in A4, A4R, A3.
100 Sheets per box.

XP Adhesive Matt White in A4. Clear Window Film in A3.
50 Sheets per box.

Micro packs of 25 x A4 available for all of the above.

CL MEDIA - Pre-Cut Products

Range of printable pre-cut synthetic media for use in compatible laser/toner colour copiers and printers.

Templates available for wristbands, ID cards and doorhangers.

Available in A4. 25 Sheets per box.

Cutter / Plotters

MagiCut

HTV - Print & Cut Materials

The process enables MagiCut media to be cut, weeded, and applied to garments and textiles.

**ENTRY LEVEL
OPTION**

Graphtec Silhouette Cameo
Cutting Area: 30 x 60 cm with a cutting mat
Includes Silhouette Studio Software
For MAC & PC

Graphtec CE8000-60 Cutter Plotter
60cm Cutting Width
Includes Graphtec Pro Studio for Windows
& Graphtec Studio For Mac

Cutter/Plotters are a great way to decorate textiles simply and affordably.

They work by sending information from a computer to the cutter which moves coloured material back and forth and allows a blade to cut the design out.

The excess material is then 'weeded' by hand and the design is heat applied to the textile. Multiple colours/effects can be applied in this way.

Our range includes cutters from Graphtec with warranty and conform to all CE & RoHS legislation. Training and support available.

1. DESIGN
Import your design and adjust to your needs

2. CUT
Cut your design with a plotter/cutter

MagicCut[®]

CUT & WEED

3. WEED
Remove the excess of the HTV material

4. PRESS

5. CARRIER
Remove the carrier and the job is done

Accessories

Professional Accessories for Professional Results

A range of accessories are available to help in the production of garments and printed items.

Application pads, sponges, PTFE sheets, heat tape, weeding tools, and cutting sets for perfect results time after time.

123FLEX

123PREMIUM FLEX

Offers the advantage of no pre-press required, warm or cold peel, PVC free and reduced application time for production environments.

Application is a 3 - 5 second press to the garment at 160°C and a warm peel. For easily marked or heat sensitive fabrics 123Flex can be applied at 120°C for 15 - 20 seconds with a cold peel which helps to avoid colour migration.

Suitable for cotton, polyester and mixed blends. Washable up to 60°C. Available in 41 colours, with an additional white version with embossed backing, for more visible weeding.

Roll widths 500mm, sold by the metre.

123Premium Flex offers the same attributes and technical advantages as 123Flex, in addition it possesses a 'tackier' carrier enabling detailed and intricate designs to be easily cut and weeded.

Application is a 3 - 5 second press to the garment at 160°C and a warm peel. For easily marked or sensitive fabrics 123 Premium can be applied at 120°C for 15 - 20 seconds with a cold peel which helps to avoid colour migration.

Suitable for cotton, polyester and mixed blends. Washable up to 60°C. Available in 41 colours, with an additional white version with embossed backing, for more visible weeding.

Roll widths 500mm, sold by the metre.

Colour swatch available

Tiffany Blue	Violet	Neon Yellow	Neon Green	Neon Orange	Neon Pink	Neon Blue

McGLITTER

The McGlitter is suitable to transfer onto cotton, mixtures of polyester/cotton and polyester/acrylic. Laminated with a thermally activated adhesive and self-adhesive polyester liner, which allows repositioning of transfers prior to pressing.

Press at 155°C - 165°C for 15 - 18 seconds.

Washable up to 60°C

Available in 29 colour options. Roll widths 500mm, sold by the metre.

Colour swatch available

PREMIUM FLOCK

High-quality heat transfer rayon flock with high density fibres. Perfect for sports and leisurewear decoration. Excellent cutting and weeding properties.

The self-adhesive polyester carrier allows repositioning of transfers prior to pressing.

Press at 155°C - 170°C for 17 - 20 seconds.

Washable up to 60°C and also suitable for dry cleaning.

Superb soft touch. Wash textiles inside out.

Available in 40 colour options. Roll widths 500mm, sold by the metre.

Colour swatch available

SOFTMETALLIC

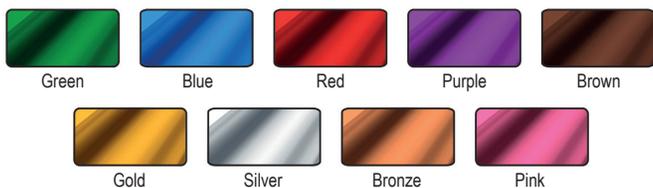

The SoftMetallics are perfect for cotton, polyester and poly/cotton blends as well as performance fabrics that require that extra stretch flexibility from the transfer.

Press at 150°C for 10 seconds.

Available in 9 colour options. Roll widths 500mm, sold by the metre.

Colour swatch available

Heat Transfer Vinyl

NYLON FLEX

Specially formulated for nylon and hydrophobic garments and fabrics. Excellent cutting and weeding properties.

Press first at 150°C for 4 seconds, cold peel and after press for a further 15 seconds.

Washable up to a temperature of 30°C and suitable for dry cleaning.

Available in 15 colour options. Roll widths 500mm, sold by the metre.

FASHION

Range of fashion based designs and unique surface finishes.

Effects include metallics, carbonium, denim, twill, spangle, snake and marble.

The self-adhesive polyester carrier allows repositioning of transfers prior to pressing.

Press at 155°C - 165°C for 17 - 20 seconds.

Washable up to 60°C and suitable for dry cleaning.

Available in 21 colour options. Roll widths 480mm, sold by the metre.

FX RANGE

High-quality flex film with special surface effect laminated with a thermally activated adhesive.

Featuring glitters, holographic, pearl, starflex, reflective and brilliant metallic options.

The self-adhesive polyester carrier allows repositioning of transfers prior to pressing.

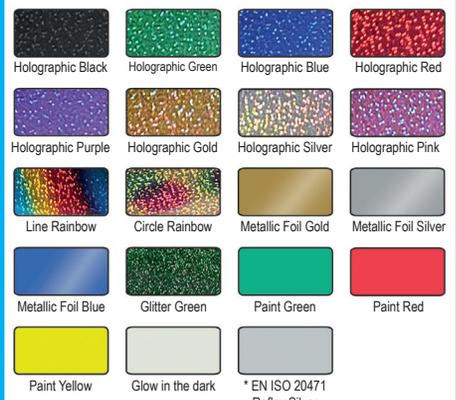

Press at 150°C - 165°C for 15 - 20 seconds.

Washable up to 60°C and suitable for dry cleaning. Brilliant Gold and Brilliant Silver are hand wash only.

Available in 19 colour options. Roll widths 500mm, sold by the metre.

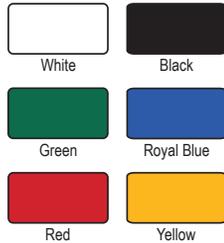

Also available in Glow in The Dark option.

* EN ISO 20471 Reflex Silver is standard specification for high visibility clothing.

PREMIUM STRETCH FLEX

High-quality polyurethane film with a matt, reflection free surface laminated with a heat sealing adhesive.

Excellent opacity and elasticity, perfect for sports and leisurewear decoration.

The self-adhesive polyester carrier allows repositioning.

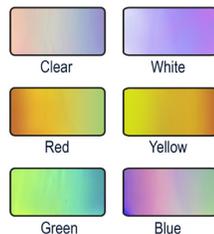

Press at 160°C for 15 seconds.

Washable up to 60°C and suitable for dry cleaning.

Available in 6 colour options.

Roll widths 500mm, sold by the metre.

RAINBOW SPECTRUM

Perfect for texts, numbers and logos with a unique metallic colour effect. Rainbow Spectrum is a moving, reflective iridescent flex that changes colour in the light.

Suitable for cotton, polyester and mixed blends.

Press at 150°C for 10 seconds. Washable up to 60°C.

Available in 6 colour options.

Roll widths 500mm, sold by the metre.

SUBLOCK

Suitable for transfer onto polyester, polyester/cotton, polyester/acrylic fabrics, soft shell and other similar treated garments and fabrics.

Blockout layer avoids bleed through and dye migration on polyester sports shirts. Excellent opacity and soft feel.

Perfect for names, numbers and logos for sportswear, bags and promotional items. Roll widths 500mm, sold by the metre. Available in white only.

PUFF

MagiCut Puff is the perfect HTV for creating cloud-like 3D designs with just one layer of HTV. After heat is applied it puffs like no other HTV on the market today. It's very easy to cut, and when applied on to the garment it has a very smooth feel.

Roll widths 500mm, sold by the metre.

Suitable for cotton, polyester and mixed blends.

Press at 150°C for 10-15 seconds.

Washable up to 60°C.

Available in 4 colour options.

Roll widths 500mm, sold by the metre.

REFLECTIVE

Reflective heat transfer vinyl for garments and textiles allows the designs and logos to be visible in low-light conditions, making them useful for enhancing visibility and safety.

Suitable for cotton, polyester and mixed blends.

Press at 130°C for 15 seconds.

Washable up to 60°C.

Available in 4 colour options.

Roll widths 500mm, sold by the metre.

Heat Transfer Vinyl

PREMIUM

High-quality polyurethane film with a matt, reflection free surface laminated with a heat sealing adhesive. Excellent opacity and elasticity, perfect for sports and leisurewear decoration. The self-adhesive polyester carrier allows repositioning.

Press at 160°C for 15 seconds.

Washable up to 60°C and suitable for dry cleaning.

Available in 40 colour options, Roll widths 500mm, sold by the metre.

Please note: Colours marked with an * possess excellent sublimation resistance due to the type of pigment used, even though they do not have an extra blockout coating.

REFLECTRA

Reflectra® transfer is a unique reflective product for use with both embroidery machines (Stitchfoil) and traditional plotter/cutters (Plotfoil).

Available in sheet format (480mm x 320mm) with a range of colours and choice of stunning effects.

Embroidered garments decorated with Reflectra transfers assist to increase the product value whilst reducing stitch time by using a simple outline satin stitch.

Reflectra highlights a powerful illumination effect when exposed to any direct light source or flashes from cameras or smart phones.

The products offer great potential for garment decoration over many markets including fashion, promotional, sportswear, and workwear.

All materials are ecologically friendly, free from PVC, softeners and heavy metals. All ingredients used meet the requirements of the Oeko-Tex® standards.

ALL-IN-ONE PRINTEX SOLDARK

Heat resistant application tape, suitable for applying your print & cut graphics to textiles.

Available as medium tack (best for detailed designs) or low tack (sometimes preferred for blockier graphics).

Available in 25m rolls in widths of 500mm and 750mm.

For customers using "Print & Cut" technology we offer our latest innovation for garment and textile decoration with the new "All-in-One" printable PU, Printex-Soldark.

The improved and re-engineered coating formulation is now compatible with all Solvent, Eco-Solvent, Solmax, Solmax 3, TrueVis, Latex and Resin based inks. Superb ink absorption producing vivid colours and softer hand feel.

Suitable for transfer onto cotton, polyester, polyester/cotton, mixed/acrylic fabrics, softshell and other performance garments and fabrics. Perfect for full colour logos, designs, names, numbers and transfers for most types of sportswear, workwear and promotional items.

Available in 25m rolls in widths of 500mm, 750mm and 1020mm.

Please note: Printex-Soldark transfers are applied to garments and textiles using traditional application tape. Suitable for selected Mimaki, Mutoh, Roland and HP printers.

Remove the excess and add Application Tape for easy transferring

4. PEEL

Remove the liner from the Printex Soldark media

5. PRESS & REMOVE

Press Application Tape and remove

Sublimation Printers

Sublimation as a production technique is simple, the sublimation inks are printed onto sublimation transfer paper which when heated turns to a gas and sublimates the image to the polyester fabric or the polyester coated surface.

The result is a premium full colour photographic quality image that will not crack, fade or peel away from the surface. Sublimation dyes are not opaque and therefore the printed surface needs to be either white or pastel colour.

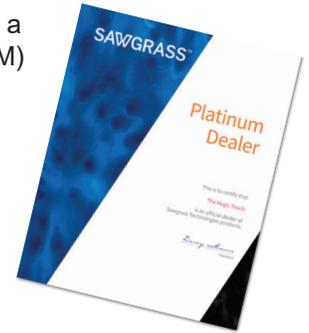

Sublimation Transfers

The SG500 and SG1000 print bright, vibrant images using SubliJet-HD inks. Formulated to provide a high yield and an expanded colour gamut. Suitable for both Windows or MacOS.

Printing at a maximum resolution of 1200 x 1200 dpi, both machines come complete with a set of four regular capacity SubliJet-HD ink cartridges, colour management software (VPM) USB cable and Creative Studio software available online together with a 2 year warranty.

The SG500 is predominately used as an A4 machine but can print up to 216 x 356mm, the SG1000 prints up to 279 x 432mm as standard but is expandable up to 330mm x 1.3m with extended paper tray.

Please call for large-format sublimation options.

- Weight - 13.8 kg
- Maximum transfer size - 40 x 50cm
- Powered From Standard Domestic Plug Socket
- One Year Warranty

Adkins Pro Cure Double Oven

The Adkins Pro desktop oven delivers consistent results when manually curing mid-volume DTF transfers. Featuring two reciprocating mesh trays (62 x 42cm) allowing users to cure in one tray and prepare the next transfer in the other. The compact design with integrated filtration operates from a standard domestic 13amp socket and features a unique dual heat process of five upper and five lower heating elements enabling transfers to cure better and quicker.

- Two 62 x 42cm Reciprocating Trays
- Each Tray Fits up to 62 x 42cm
- Internal Filtration, Circulation & Extraction System
- Accessible Replaceable HEPA & Carbon Filters
- Digital Touch Screen Display
- Dimensions - H 55 x W 86 x D 67cm
- Weight - 82 Kgs
- Powered From Standard Domestic Plug Socket
- One Year Warranty

Adkins Inline Compact 600 Finishing Unit

The perfect option to control and manage volume curing of roll-to-roll DTF transfers. The compact design with integrated filtration operates from a standard domestic 13amp socket and features a unique dual heat process of five upper and five lower heating elements enabling transfers to cure better and quicker. The managed air and heat distribution across the transfer with reduced curing time and lower temperature enables lower cost.

- 60cm Max Media Width
- Space Saving Design
- Versatile Auto Feed Speed Detection
- Internal Filtration, Circulation & Extraction System
- Replaceable HEPA Filters
- Low Powder Warning Light
- Digital Touch Screen Display
- Dimensions - H 114 x W 98 x D 143cm
- Weight - 192 Kgs
- Powered From Standard Domestic Plug Socket
- One Year Warranty

Service & Support

Every DTF printer purchase includes delivery, installation and training (UK Mainland Only) conducted by our experienced technical team. Pre installation training and product marketing is also available.

The Magic Transfer Company also offer online support using the built-in Spalsttop remote link to enable any questions or issues to be resolved quickly and professionally.

DTF Magic® Vega-8 8-Head 9-Colour Printer

Vega-8

Introducing the future for volume DTF transfer production with the debut of possibly the most powerful 9-Colour DTF printer on the market today.

The DTF Magic® “Vega-8” solution is designed and engineered for industrial transfer production on a scale as never seen before from a single printer. The innovative printer features 8 x Epson i3200-A1 high-speed printheads, supports 5, 9 and an option up to 13 colours, up to 80cm print width and output speeds at over 50m an hour!

The printer and its unique finishing unit offers the next generation of DTF printing with demand and interest growing due to the considerable cost savings achieved in both labour and overall running costs, helping to dramatically reduce the cost per transfer. At the same time producing the highest quality and consistent transfers.

The Vega-8 delivers productivity and vibrant print quality for garment decorators to scale up production volumes. Featuring a dual rail system and magnetic drive to ensure smooth stability, no belts, no drag, just high-speed production. Installed with NeoStampa RIP Software. The Vega-8 model also offers the ability to load 100m, 200m and even 500m rolls of DTF film.

The production configuration combines the ultimate in DTF transfer finishing with its unique dual-oven (up to 80cm) and built-in purifiers to ensure perfect curing for all transfers in any environment.

Supplied with the GOTS and OEKO-TEX certified Low Sediment inks this new solution creates a higher standard for DTF printing and sets a new benchmark in terms of quality and consistent production. This really is the new generation of DTF technology. The DTF Magic® Vega-8 is not just a printer; it is a production powerhouse!

KEY FEATURES OF THE DTF Magic® Vega-8 PRINTER

- 8 x i3200-A1 Printheads
- Prints up to 80cm
- New Nozzle Monitoring Compensation Technology
- Upgraded Damper Heating
- Intelligent Tension Bar
- Heavy-Duty DTF Film Feeding System
- Automatic Print Head Online Moisturising
- LCD Screen
- Waste ink and Powder alarms.
- Low-Sediment DTF Inks (9 Colour)
- NeoStampa RIP Software
- Dimensions (With Stand) H 134 W 251 x D75
- Weight 275kgs
- **Automatic Finisher:**
- Multi-Stage Automatic Heating
- 220v/Rated Power 6.6kw - Rated Power Supply 63A, Power Consumption - 2.2kWh – 5KWh
- Dimensions: H 107 x W 133 x D 293 cm – Weight 210kgs
- Minimum Footprint - 5m x 3.5m

Please note the running cost of the finishing unit using maximum power and speed at 6.6kW costs approximately £1.83 per hour, based on the January 2026 energy price cap for businesses at 27.69p per kWh. This excludes any daily standing charges and no allowance for lower rates available during night hours.

Every DTF printer purchase includes Mainland UK delivery, Installation, training and support.

DTF Magic 3D UV Textile Badge Printer

KEY FEATURES OF DTF Magic UV 3D Badge Printer

- 1 x EPSON i3200-U1HD Printhead
- Multi-Layering
3D Adjustable from 0.1 - 5mm
- Print width 62cm
- Includes Devstudio Software
- CMYK + White + Varnish
- Dimensions including stand:
H 112 x W 157 x D 88cm
- Weight: 149Kgs
- Built-in Air Cooled Purifier

Introducing our latest transfer innovation with a full colour 3D UV textile badge printer enabling the creation of custom badges for garments and textiles, with a difference.

The 3D UV badges are digitally printed using a multi-layering technique with newly developed “Soft UV” inks onto a 60cm coated TPU film carrier. The badges offer a flexible, soft-touch, vibrant and durable high-quality alternative with intricate detail for the decoration of sportswear, fashion, workwear, and corporate branding.

The printer is able to lay down layers of white “Soft UV” ink, building the 3D effect and curing with each pass on the TPU film carrier (available in 60cm x 25m rolls in White, Gold and Silver). The final layer is full colour with the option of applying gloss varnish to complete the process.

The printed badges can be applied to a multitude of textiles including cotton, polyester, mixed fibres, canvas, twill, felt, leather, denim and more all using a traditional heat press. Perfect for the decoration of all apparel, hats, caps, bags, shoes, and a vast number of promotional products.

The high visual quality and 3D texture offers users the ability to add value and an element of elegance to any textile based decorated product.

The 60cm roll-to-roll 3D UV printer features a single Epson i3200-U1 HD print head with eco-friendly, non-toxic CMYK+W and varnish inks. The printed 3D UV transfers can also be profile cut using a traditional plotter for precise and consistent cutting and ready for product application using a traditional heat press.

Consumables:
Soft UV Ink CMYK + White + Varnish - 1L Bottles
White, Silver and Gold UV TPU DTF Film – 60cm x 25m

Every DTF printer purchase includes Mainland UK delivery, Installation, training and support.

Heat Presses

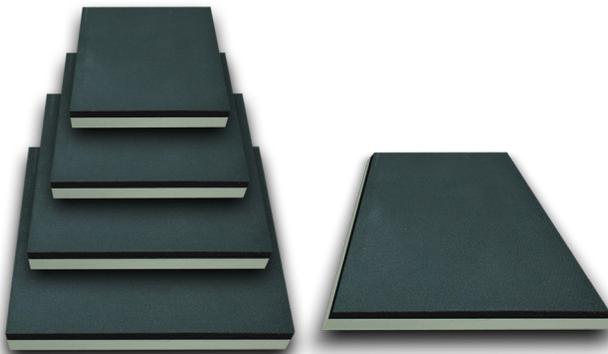

To ensure safe and consistent results we recommend using professional, reliable and safe equipment. All flatbed presses (which cover 90% of applications) are supplied with a lifetime guarantee on selected heat platens.

Swing Head Manual 38 x 50cm

Swing head manual heat press, professional level for all transfer operations. The swing head operation gives the perfect view of both transfer and garment positioning. Digital time, temperature controller and adjustable pressure. Includes 2 PTFE Sheets.

Platen Size: 38 x 50cm
Detachable platen tables are also available in: 30 x 30cm, 25 x 25cm, 20 x 20cm, 15 x 15cm, 21 x 38cm (umbrella platen)

Working Area: H 64 x W 92 x D110cm

Weight: 52kgs

CE marked and certified according to Machinery Low Voltage EEC Directives.

Warranty: 12 months (Machine)
Lifetime (Heat Element)

HTP123 Pro 42 x 42cm

Professional drawer-platen clam heat press. This press is fully compatible with all our transfer processes. The 'cast element' together with digital controller and adjustable pressure. Perfect A3 production press.

Includes 2 PTFE Sheets.

Platen Size: 42 x 42cm
Detachable platen tables are also available in: 50 x 15cm, 25 x 15cm and 10 x 10cm
Working Area: H 44 x W 63x D 86cm
Weight: 46.5kgs

CE marked and certified according to Machinery Low Voltage EEC Directives.

Warranty: 2 years (Machine) 10 years (Heat Element)

T.Seal Finishing Sheet

The T-Seal Transfer finishing sheet has a special silicone coating that locks the design into your garment or textile and dramatically extends the washability of all your designs. For DTF and Toner based transfers. Available in A4 and A3.

HTP123 Basic 28 x 38cm

Entry level clam heat press. Fully compatible with all TheMagicTouch Toner Transfer, MagiCut Heat Transfer Vinyl, DyeSub Magic Sublimation and DTFMagic Direct To Film transfer processes.

The 'cast element' together with digital controller and adjustable pressure offers what we consider to be the best value press available today. Includes 2 PTFE Sheets.

Platen Size: 28 x 38cm

Working Area: H 86 W 41 x D 63cm - Weight: 32kgs

CE marked and certified according to Machinery Low Voltage EEC Directives.

Warranty: 12 months (Machine) 10 years (Heat Element)

Swing Head Manual Deep Impact 38 x 50cm

This swing head manual heat press is adapted for thicker items with the inclusion of a longer rear head post, that lifts the heat plate higher providing an additional 2.5cm clearance between the heat plate and table, which makes it possible to press onto thicker substrates. Includes 2 PTFE Sheets.

Platen Size: 38 x 50cm

Detachable platen tables are also available in: 30 x 30cm, 25 x 25cm, 20 x 20cm, 15 x 15cm, 38x21cm (umbrella platen)

Working Area: H 64 x W 92 x D 110cm - Weight: 52kgs

CE marked and certified according to Machinery Low Voltage EEC Directives.

Warranty: 12 months (Machine) Lifetime (Heat Element)

Swing Head Manual 42 x 60cm

This swing head manual heat press has a larger sized heat plate of 42 x 60cm.

This model is ideal for users that require larger pressing capabilities. Includes 2 PTFE Sheets.

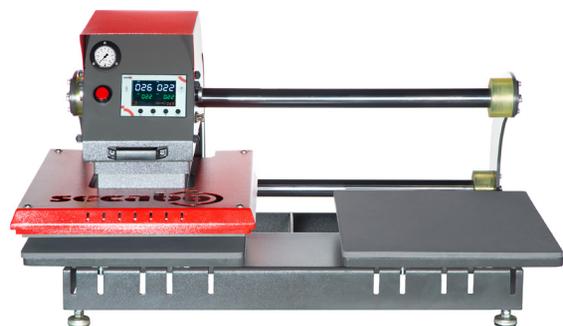

Platen Size: 42 x 60cm

Working Area: H 64 x W110 x D 120cm - Weight: 57kgs

CE marked and certified according to Machinery Low Voltage EEC Directives.

Warranty: 12 months (Machine) Lifetime (Heat Element)

Secabo TPD7 Twin Pneumatic Heat Press

The Secabo TPD7 Twin Pneumatic Heat Press provides a particularly large working area for convenient positioning of transfer objects, measuring 40 x 50cm each.

The TPD7's base plates are supplied in portrait format, making it easier to precisely position the transfers to be applied.

Platen Size: 40 x 50cm each

Warranty is 2 Years on all parts

Heat Presses

Cap/Pocket/Hat Combi

Perfect for pressing caps, beanie hats, sleeves, balls and pocket areas.

This press comes complete with a 15 x 9cm curved element and base table for caps/hats and a 25.5 x 20.5cm element and base table for flat items.

Warranty: 12 months (Machine)

Pneumatic Heat Press

Automatic air compression removes operator fatigue. Ideal for large volume production.

Includes 2 PTFE sheets. Use in conjunction with an air compressor.

Swing head element with print area 37 x 50cm. Optional platen sizes available.

Weight: 77kgs

Warranty: 12 months (Machine)

Used in conjunction with pneumatic heat press. Quiet operation. Hose and coupling included. Maintenance oil available.

Omega Twin Table Pneumatic Heat Press

The Omega Series 1000 is a pneumatically operated twin-table heat press for transfer printing and material fusing. It is ideal for very high volume production with low operator fatigue.

Benefits include user comfort and ease of operation, while maintaining consistent pressure control.

Weight: 182kgs

Warranty: 12 months (Machine)

Used in conjunction with pneumatic heat press. Quiet operation. Hose and coupling included. Maintenance oil available.

Arc Mug Press

Mug press complete with standard 10–11oz element. Additional elements available. Satin mug wrap required for toner printed mugs, enamel mugs and vacuum bottles.

Weight: 6.5kg

CE marked and certified according to Machinery Low Voltage EEC Directives.

12 months warranty.

Interchangeable Elements

A (1.5oz Shot glass)

B (12oz Latte)

C (17oz Latte)

D (2.5oz Espresso)

E (6-10oz Mug)

F (10-11oz Mug)

G (Enamel Mug)

H (20oz Bottle)

Silicon wrap for Dark Coloured Mugs and Vacuum Bottles

Our Mission

To provide high quality products and image transfer solutions for all aspects of product decoration and personalisation which meet and exceed industry expectations. Recognised as the global market leader in innovation and product development.

Demonstrations

We offer demonstrations at our Showroom in Dunstable Monday to Friday, and also via Zoom through our High Definition set up giving you full access to all machines and software in our showrooms.
